

EQUIPMENT CONTROL SELECTION CHART

SEE SPECIFICATION SHEETS FOR DETAIL

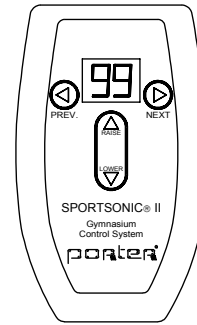

KEY SWITCH (E-791)

- Key turn operation
- Available in multi switch, multi gang options
- Momentary key switch furnished with two keys (up and down) to prevent the possibility of instantaneous reversing of the winch, which could result in overriding the limit switches, or placing undue stress on hoist system.

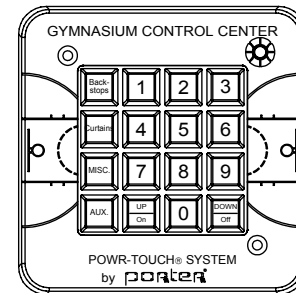

SPORTSONIC II (E-2002)

- Cordless handheld transmitter (available in multiple unit operator levels)
- Receiver
- Receiver with secondary key switch input
- Radio controlled to eliminate complicated control wiring
- 100' operating range

POWERTOUCH 2.5 (E-2555)

- Electronic Touchpad (custom equipment legend available)
- Electronic Control Panel (controls up to 8 Porter devices)
- Up to 7 touchpads can interface with a control panel network
- Up to sixteen control panels can be networked via two communication wires to control 128 Porter devices and 32 auxiliary devices.
- Requires constant pressure on the pad button to control the gymnasium apparatus for safety.

POWERTOUCH 5 (E-12800)

- Wireless equipment operation
- Operates on any network connected device with access to Google Chrome
- Customized graphics for each facility
- Passcode protected application for administrator and operator security
- Programmable to be capable of operating up to 62 devices, including auxiliary devices
- Requires constant contact with the slide icon during equipment travel for safety
