**IMPORTANT NOTE** - Check net height settings at both court lines to ensure that net is level before applying net height labels on inside upright assembly.

**CAUTION** - Net height dimensions given allow for maximum allowable net sag. Over tightening of the net could cause possible equipment damage or failure, and void all warranties.

- 1 -
1. Unpack all parts and check against parts list to ensure that all have been included. **Tools required - 9/16" wrenches, 5/32" and 3/16" allen wrenches, tape measure, drill with 3/16" drill bit.**

2. Assemble three rubber feet (18) to underside of T-Base (9) using two 1/4" x 3/4" lg. cap screws (19) at each rubber foot. Repeat for other T-Base (9).

3. Assemble handwheel with stud (10) to T-Base (9) using spring (11), 1/2" nylon flatwasher (12), 1/2" flatwasher (13) and 1/2" retainer washer (14). Repeat for other handwheels on both T-Bases.

4. Assemble two wheels (15) to T-Base (9) using 3/8" x 2-1/2" lg. bolts (16) and locking cap nuts (17). Repeat for other T-Base (9).

5. Attach winch (3) using instructions provided in the winch box.

6. Slide the net tie-off sleeve (5) onto outside upright assembly (2) from bottom, with net cable hook facing downward as shown. Locate top of net tie-off sleeve (5) about 39" from bottom of upright, in line with pulley sheave on inside upright assembly (1). Tighten two set screws securely. Use the 1/4" hole in the net tie-off sleeve (5) as a guide and drill a 3/16" hole through the upright (2). Insert #12 Phillips head screw and drill it in place. See detail on Page 1.

7. Place assembled standards in T-Base. Rotate standards until winch (3) and tie-off sleeve (5) are oriented as shown in the detail on Page 1. Secure upright to T-Base with two 5/16" x 3/8" lg. set screws (20). Secure T-Base/upright assemblies to pre-installed floor anchors using both handwheels (10) on each base. **NOTE - T-Bases MUST be anchored to the floor before the net can be attached to the uprights.** See Detail "A" on Page 5 for floor anchor location details.

8. Attach the net using instructions provided in the net box.

9. Adjust net to desired height by loosening pressure-locking T-handle on outside upright assembly (2). Slide inside upright assembly (1) up or down to desired net height, then re-tighten T-handle. See net height chart on page 1. Net height is measured at center of court. Note that a maximum of 3/4" net sag is allowed - net height can be 3/4" higher at court lines than at center of court. After proper net height is obtained, place appropriate height label onto inside upright assembly (1). Repeat above for all remaining net height settings.
Section "A-A"
No. 1995 END STANDARDS

FLAT SURFACES FOR HEIGHT LABELS
CAUTION

- Uprights are equipped with a spring counterbalance mechanism. Release the Pressure-Lock Assembly ONLY WHEN UPRIGHT IS IN THE VERTICAL POSITION.

- NEVER install net onto portable uprights until the uprights are securely attached to the floor anchors.

- Do not over tighten the volleyball net, as damage to uprights may result and void all written or implied warranties.

- Cable tension must be released before adjusting net height. Failure to do so may cause damage to the equipment, or cause personal injury.

WARNING

- Serious injuries, including permanent paralysis, can occur in volleyball. Such can be caused by falls on the head, neck and other parts of the body, or by running into unpadded volleyball standards. Approved upright padding is mandatory.

- While it cannot be eliminated, the risk of injuries can be greatly reduced by following proper safety guidelines and providing proper maintenance and safety inspections.

GENERAL MAINTENANCE

- Inspect this equipment for wear, loose fittings, damage and proper stability before each use. Replace defective or worn parts immediately. If in doubt, do not use this equipment until repaired. Check pressure-lock assembly for wear and to ensure it is functioning properly.

- Lubricate threaded studs on pressure-lock assembly and tension winch periodically (at least twice a year) to minimize wear and to ensure proper operation.

STORAGE

- Under no circumstances should volleyball standards be stored leaning against a wall or other rigid objects.

- Lay posts down unless they can be securely fastened to a stable object or properly positioned in a storage rack specifically designed for volleyball standards.
